

05.31.2011

Well here at Whispering Pine Farms in Minnesota the winter is over and spring has begun. The snow and cold are giving way to warm weather and the pastures are turning green.

We would like all to know that our first ever calving season is complete and has produced some great calves. We have calves on the ground sired by New Era, Ribeye, Maxium 28M along with a few others. We also have calves out of our herd sires, 9196 a Nitro son out of the 0112K Copper cow owned by Colyer Herefords and an Online son out of a Airwave daughter owned by Able Acres.

Please come and visit our farm anytime and take a look at our cows and calves. These first bull calves will be available by private treaty and consignment sales later in 2011 and the spring of 2012.

Welcome To The Farm And Have A Great Summer.

Jason & Marcy McDonald with our children.
